

Being prepared means your clients get their medications—even during disasters!

During a disaster, **Pharmacy Alternatives** delivery services may be affected. This will most likely cause delays in receiving medication unless you prepare early. As always, we are here to serve you and will utilize backup services to ensure your individuals are taken care of. If you decide to evacuate and move clients, **Pharmacy Alternatives** needs to be notified so we can ensure we have correct delivery sites. Here are some other things to remember:

1. Check and order all medication supplies early. Please make sure to include inhalers, eye drops, creams, ointments, birth control and REFRIGERATED ITEMS, as well as any routine/non-cycle fill medication.
2. If you evacuate, you must notify our pharmacy of the location of each client.
3. Ensure all QuickMAR laptops are fully charged and take ALL laptops, cables and chargers with you if you evacuate.
4. Print an extra set of paper MARs to have on hand.
5. Fill up early with gas to avoid fuel shortages.
6. Purchase essential items early (food, water, batteries etc...).
7. Keep an emergency kit with you at all times.
8. Follow all your organizational policies and procedures regarding disaster/evacuation processes.

If you evacuate, you must notify our pharmacy of the location of each client.
